

Annexes

The following seven annexes provide additional information related to the material presented in the main body of this report as directed in the *UNFCCC Guidelines on Reporting and Review* (GE.03-60887). Annex 1 contains an analysis of the key categories of emissions discussed in this report and a review of the methodology used to identify those key categories. Annex 2 describes the methodologies used to estimate CO₂ emissions from fossil fuel combustion, the carbon content of fossil fuels, and the amount of carbon stored in products from non-energy uses of fossil fuels. Annex 3 discusses the methodologies used for a number of individual source categories in greater detail than was presented in the main body of the report and includes explicit activity data and emission factor tables. Annex 4 presents the IPCC reference approach for estimating CO₂ emissions from fossil fuel combustion. Annex 5 addresses the criteria for the inclusion of an emission source category and discusses some of the sources that are excluded from U.S. estimates. Annex 6 provides a range of additional information that is relevant to the contents of this report. Finally, Annex 7 provides data on the uncertainty of the emission estimates included in this report.

Annexes.....	A-1
ANNEX 1 Key Category Analysis	A-3
ANNEX 2 Methodology and Data for Estimating CO ₂ Emissions from Fossil Fuel Combustion.....	A-19
2.1. Methodology for Estimating Emissions of CO ₂ from Fossil Fuel Combustion.....	A-19
2.2. Methodology for Estimating the Carbon Content of Fossil Fuels	A-42
2.3. Methodology for Estimating Carbon Emitted from Non-Energy Uses of Fossil Fuels.....	A-69
ANNEX 3 Methodological Descriptions for Additional Source or Sink Categories.....	A-95
3.1. Methodology for Estimating Emissions of CH ₄ , N ₂ O, and Indirect Greenhouse Gases from Stationary Combustion	A-95
3.2. Methodology for Estimating Emissions of CH ₄ , N ₂ O, and Indirect Greenhouse Gases from Mobile Combustion and Methodology for and Supplemental Information on Transportation-Related GHG Emissions	A-102
3.3. Methodology for Estimating CH ₄ Emissions from Coal Mining	A-124
3.4. Methodology for Estimating CH ₄ Emissions from Natural Gas Systems.....	A-131
3.5. Methodology for Estimating CH ₄ and CO ₂ Emissions from Petroleum Systems.....	A-142
3.6. Methodology for Estimating CO ₂ and N ₂ O Emissions from Municipal Solid Waste Combustion	A-147
3.7. Methodology for Estimating Emissions from International Bunker Fuels used by the U.S. Military	A-152
3.8. Methodology for Estimating HFC and PFC Emissions from Substitution of Ozone Depleting Substances	A-157
3.9. Methodology for Estimating CH ₄ Emissions from Enteric Fermentation	A-174
3.10. Methodology for Estimating CH ₄ and N ₂ O Emissions from Manure Management.....	A-185
3.11. Methodology for Estimating N ₂ O Emissions from Agricultural Soil Management	A-206
3.12. Methodology for Estimating Net Carbon Stock Changes in Forest Lands Remaining Forest Lands.....	A-225
3.13. Methodology for Estimating Net Changes in Carbon Stocks in Mineral and Organic Soils on Cropland and Grassland	249
3.14. Methodology for Estimating CH ₄ Emissions from Landfills	A-269
ANNEX 4 IPCC Reference Approach for Estimating CO ₂ Emissions from Fossil Fuel Combustion	A-275
ANNEX 5 Assessment of the Sources and Sinks of Greenhouse Gas Emissions Excluded	A-285
ANNEX 6 Additional Information.....	A-292
6.1. Global Warming Potential Values	A-292
6.2. Ozone Depleting Substance Emissions	A-299
6.3. Sulfur Dioxide Emissions	A-301
6.4. Complete List of Source Categories	A-303
6.5. Constants, Units, and Conversions.....	A-304
6.6. Abbreviations	A-307
6.7. Chemical Formulas	A-311
ANNEX 7 Uncertainty – TO BE UPDATED	A-314
7.1. Overview	A-314
7.2. Methodology and Results.....	A-314
7.3. Planned Improvements	A-319

1 7.4. Additional Information on Uncertainty Analyses by SourceA-320
